

SolarWinds Take Control Plus

Fast and powerful remote support. SolarWinds® Take Control Plus: Designed to help you take control of your business, technician efficacy, and end-user experience.

The right remote support solution doesn't just connect techs to machines, it solves business problems.

The SolarWinds Take Control Plus remote support solution provides a uniquely powerful tool for IT providers to access nearly any platform or device to solve issues quickly. It delivers clear visibility and communication capabilities to solve technical problems fast and delight end users. Packed with all the features of more premium, expensive solutions, Take Control Plus offers powerful tools, reporting, and session monitoring at an affordable price. Whether responding to a user support request or performing unattended maintenance, with Take Control Plus technicians can complete any remote support function with a minimum of clicks and time.

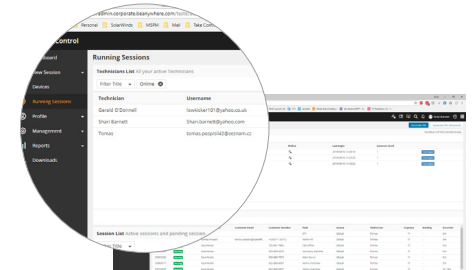

FOR YOUR TECHNICIANS

Techs need sharp, powerful tools to diagnose issues quickly and ensure end users get the service they expect. Take Control Plus offers some of the most advanced troubleshooting, communication, and security features to help get the job done right.

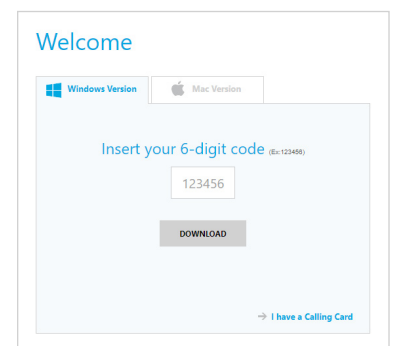

FOR YOUR BUSINESS

Take Control Plus not only provides clear dashboards and data to help you optimize business efficiency, but also tremendous flexibility to brand and configure elements to fit your business needs. Take Control Plus also considers iron-clad security to be fundamental, so you and your users can rest assured that data is designed to stay safe at every point in the support process.

FOR YOUR END USERS

A simple and pleasant user experience is always the IT support professional's goal. Fast, easy connection and fluid communication are critical to making sure end users and technicians resolve issues swiftly, the first time.
